Office Action Summary

Art Unit: 2661

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 49 - 56 and 62 - 67, drawn to a method of assembling a motor shaft with a motor component, classified in class 29, subclass 596.
 - II. Claims 57 - 61, drawn to a motor shaft assembly, classified in class 464, subclass 179.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a product wherein the fan impeller is not mechanically coupled to the motor shaft..
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
